Full-Stack Development
Masai School, Bangalore
Oct 2021 - Jul 2022

BCA (Bachelor of Computer Applications)
Lovely Professional University,
June 2013 - Apr 2017

PROFESSIONAL SUMMARY

Aspiring full stack developer with a specialization in MERN stack. Keenly interested in problem-solving and making user-centric products, self-motivated and curious. Looking forward to honing my skills in a challenging work environment.
Tech Stack: React, Redux, TypeScript, Node.js(Express.JS), JavaScript, MongoDB, Unit Testing With Jest & Testing-library, Graphql, Apollo-client.

PROFESSIONAL EXPERIENCE

Software Engineer

GoodGameNation
Building the biggest community of gamers in India
Aug 2022 - Dec 2022

- Involved in bootstrapping the platform from scratch.
- I have worked in building UI features for authentication, my schedules, my teams, tournaments and feeds by using React, Redux, MUI
- Implemented unit testing for the above features using jest and @testing-library
- Quickly learnt and implemented REST APIs and GraphQL APIs for the above features using expressJS, MongoDB, typegoose(mongoose), type-graphql, apollo/server & client
- Extensively used Supertest to implement end-end testing for REST APIs
- Involved in code reviews for pull requests

Tech stack: React with TypeScript | Redux | Unit Testing With Jest & Testing-library | Apollo-client | Material-UI | Node.js,(Express.js) | MongoDB | type-graphQL | Apollo-Server | Typegoose(mongoose) | Storybook: Frontend workshop for UI development

PROJECTS

e-Mart Ecommerce Website |

An e-commerce website for fashion and beauty-related
Features:
